

***Notes**

Aim of the Course:

In order to provide more learning opportunities for students to excel in their talented areas, the Education Bureau (EDB) has commissioned the Faculty of Science of the University of Hong Kong to develop the EDB Web-based Learning Course on Earth Science for the senior primary to junior secondary students with high potential.

Course Structure:

The course comprises 3 levels of on-line study with standards of the highest level comparable to senior secondary level. It will take one year to complete all the three levels. Students are required to pass the test at the end of each level before they can move on. Outstanding graduates from level 3 will be selected to attend a follow-up, year-long mentorship programme provided by the same tertiary institution name above. The mentorship programme comprises museum visits, intensive workshops, field visits and research projects.
