

# Virtual Learning Environment / Learning Management System

June 2016

## VLE – Typical Functions

- ▶ eLearning class (announcement, calendar, syllabus)
- ▶ Student portfolio
- ▶ Learning resource integration
- ▶ eAssessment integration
- ▶ Gradebook / report / feedback
- ▶ Poll, quiz, survey
- ▶ Multimedia assignment (student to submit video/audio)
- ▶ Collaboration
- ▶ Social network integration
- ▶ Mobile ready

## Classroom App

Student Response System:

-  Nearpod
-  Edmodo
-  Socrative

## Learning Management System / Platform

-  Forum
-  Assignment
-  eAssessment
-  Flipped classroom

## Internet Resources

-  HKEdCity Resources
-  Education Ministry
-  Khan Academy

## eTextbook

Contents

Multimedia

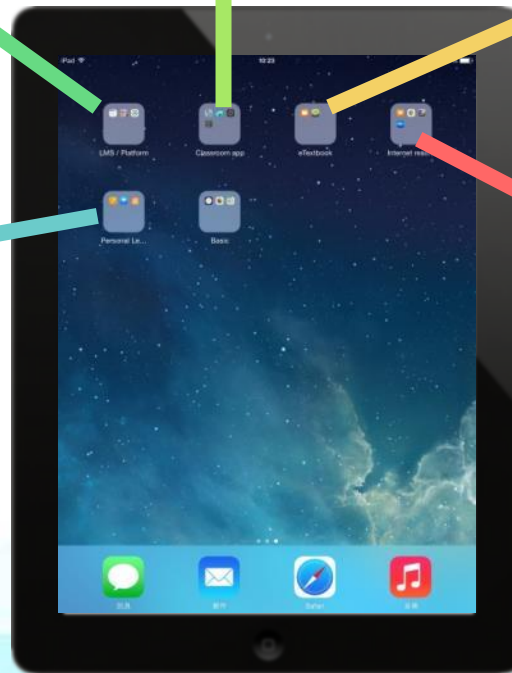

Simulation

Short quiz

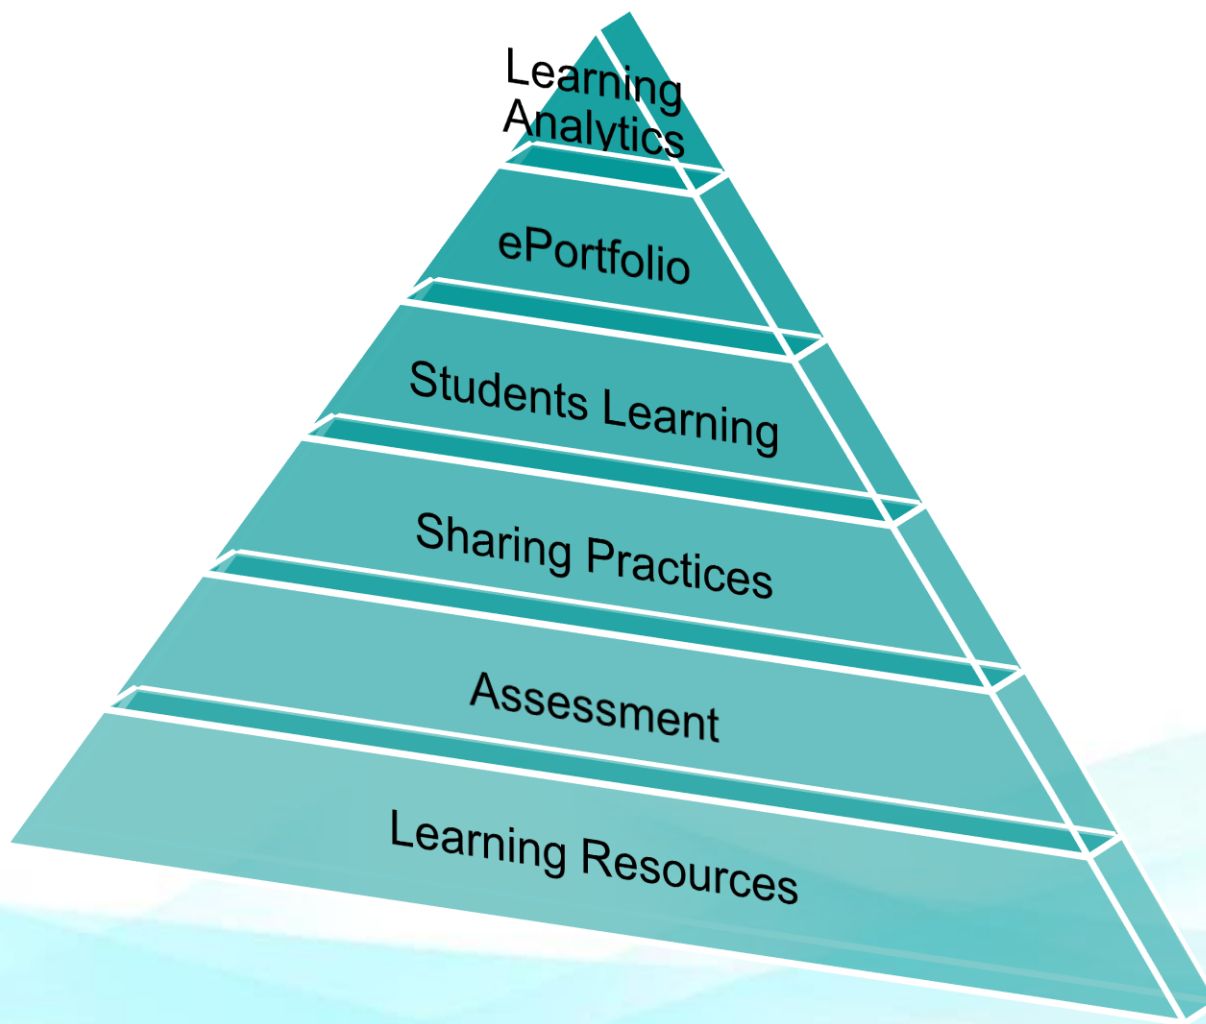

## Personal Learning Tools

-  Dictionary
-  Camera
-  Explain Everything
-  PowerPoint

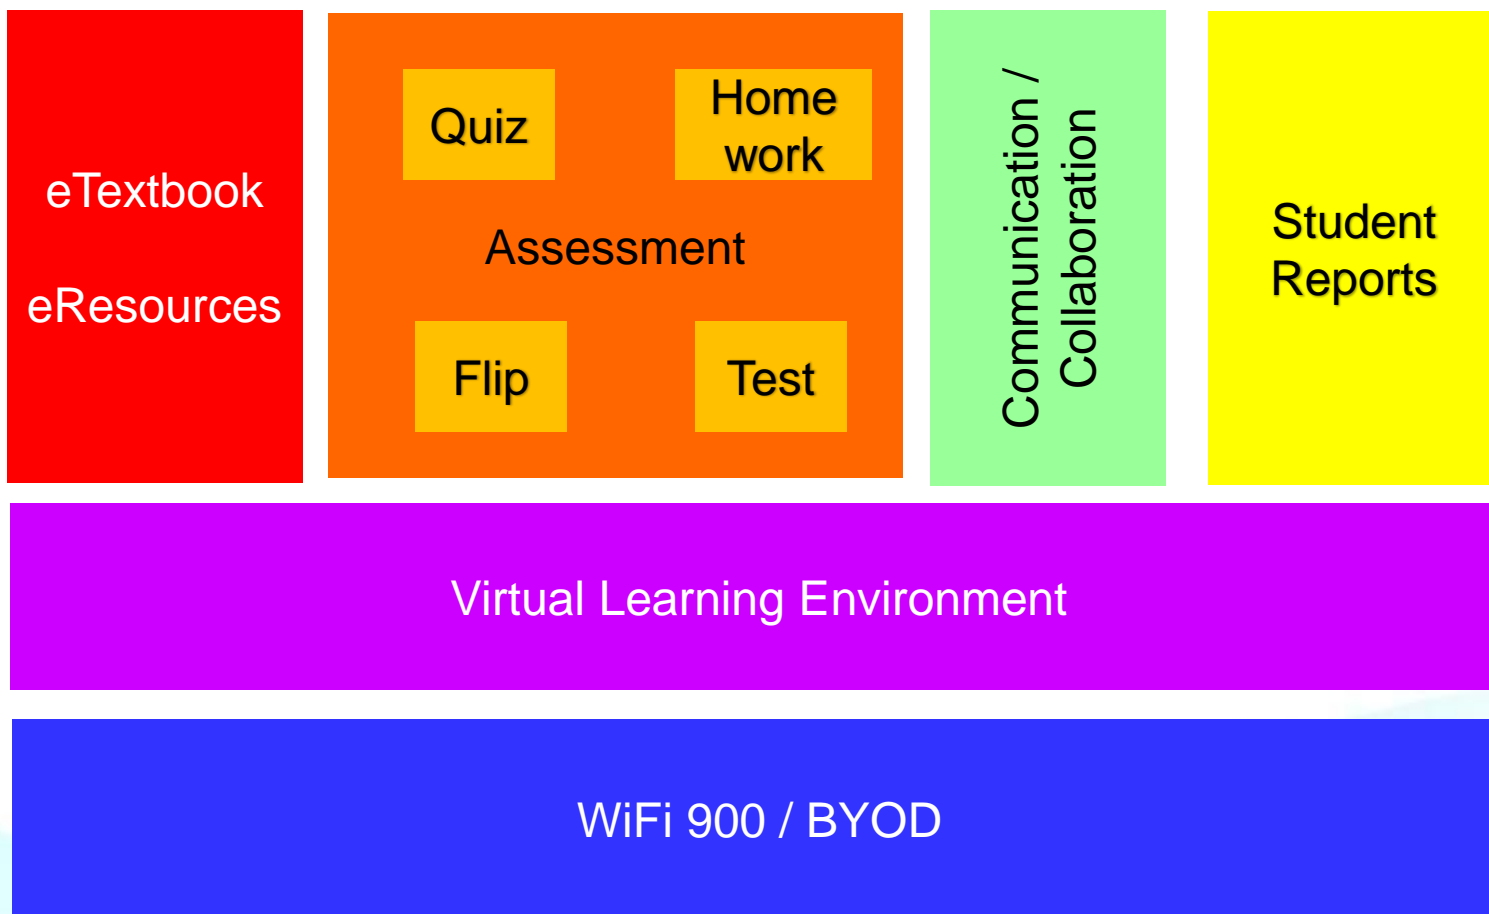

# Student's View of eLearning

## Purpose of eLearning / VLE

# Integrated eLearning

# Why are Open Standards for eLearning Important?

## Publishers need to cater for different school systems

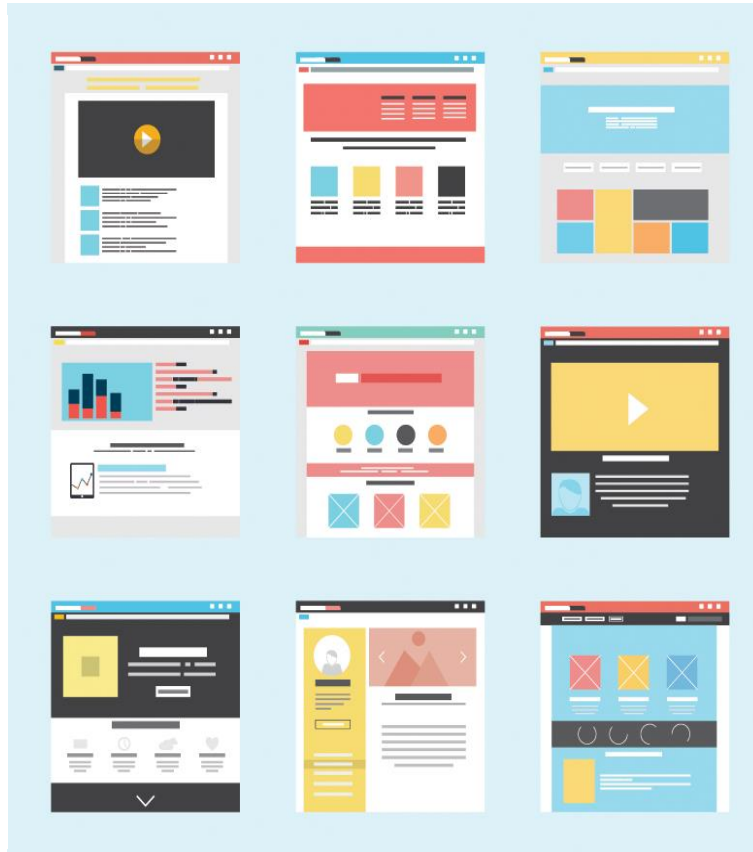

# Different publishers have different Systems too!

Publisher A

Publisher B

Publisher C

Publisher D

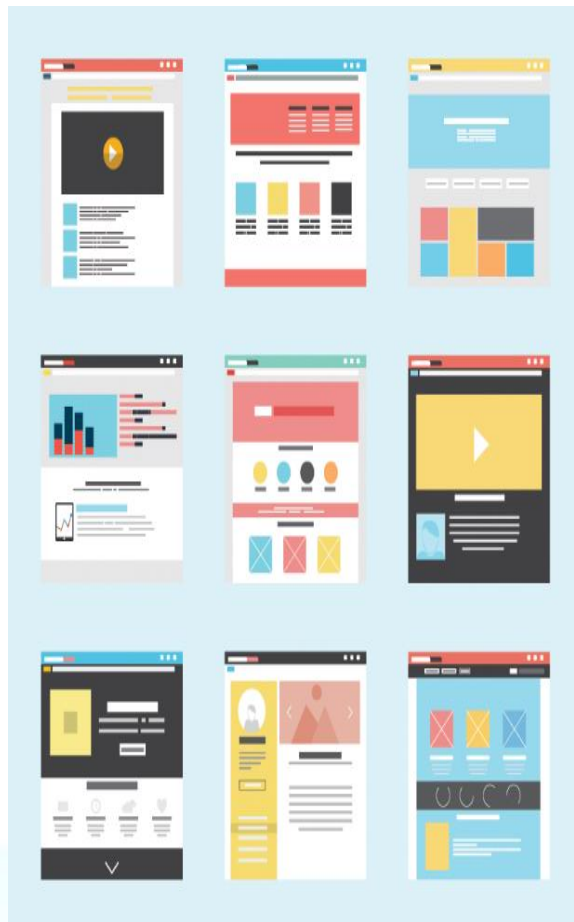

School W, X, Y, Z.....

**What if systems follow the same standards?**

Standard  
SSO and  
data  
exchange

## With Standards...

### Schools

- switch systems and with contents migrated easily
- find eLearning more user-friendly with less administrative overhead
- find more choices for best contents / resources

### Publishers

- contents / assessments can be adopted by different school systems
- no need to develop student information systems

# eLearning Marketplace

▶ Hundreds of third party APPs available

▶ <https://www.eduappcenter.com/>

## Is your school system compatible with Standards?

1.	Single Sign-on	OAUTH, SAML, 802.1X	open standard
2.	Data Format	CEDS	US, require HK standard
3.	Content Packaging	SCORM, Tin Can	open standard
4	System Integration	SIF	US standards
5.	Learning App / Tools	LTI	open standard
6.	Assessment Item Format	QTI	open standard

# Communication on Standards and Practices

## ▶ Industry Forum

- ITE4 Technical sub-group meeting on 24 Feb 2016, with full support to drive eLearning standards in the industry
- Briefing to industry / publishers conducted in mid-April with positive responses

## ▶ Seminars for schools

## Demonstration

Flipped  
Classroom

eAssessment

Project  
Based  
Learning

## *Are YOU ...*

- Vision: Implementing and deepening eLearning for whole school
- Belief: Importance of using systems / teaching materials that are standardised and compatible with others
- Aim: Building students' ePortfolios
- Facing limitations of current platforms
- Moving to cloud solutions to reduce internal technical support required

**'Build a Standardised Learning Environment and Deepen eLearning'  
together with HKEdCity**

# Virtual Learning Environment (VLE) Pilot Scheme

## ***Objectives***

- Schools to experience latest cloud based, open standard VLE system for integrating teaching, learning and assessment
- Schools able to use third party apps, assessment and resources (open standards)
- Easy to adopt with minimum technical support required in schools (unlike native moodle)
- Share practices among schools
- Facilitate longer term planning for Hong Kong

## VLE Pilot Scheme

- Pilot Scheme Period: 2016/17 – 2017/18 (2 school years)
- Participating schools **use the VLE for free**
  
- ***HKEdCity***
  - Provide VLE licences throughout the Pilot Scheme period
  - Provide set up and implementation templates for recommended practices
  - Facilitate integration with third party resources and applications
  - Training and support

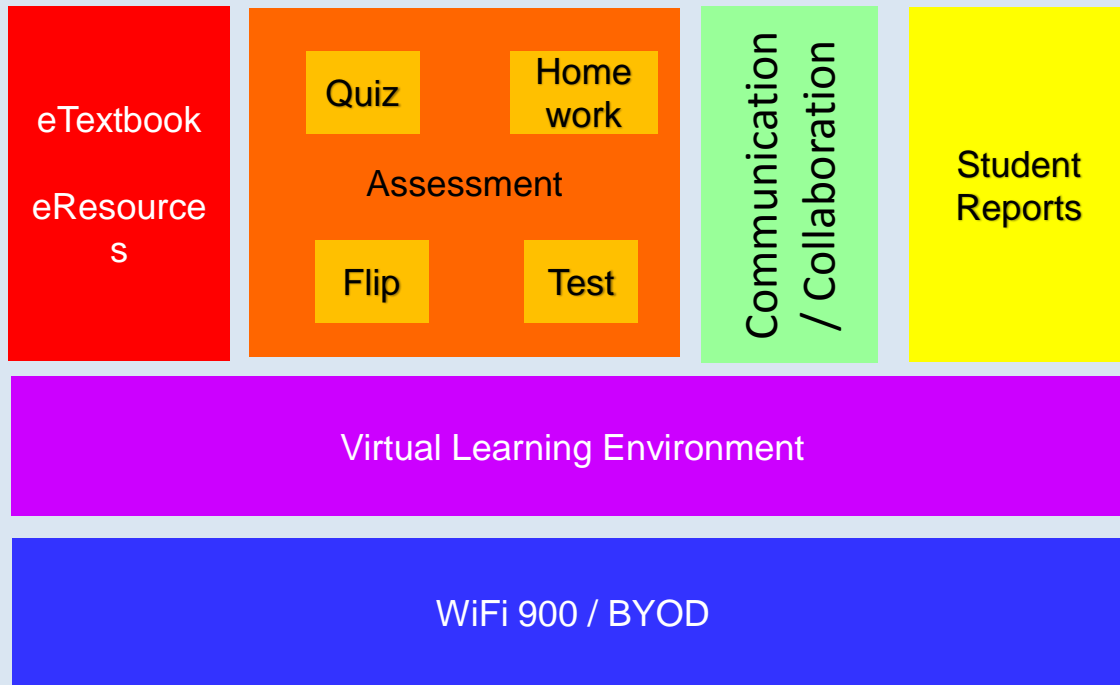

## ➤ *Schools*

- Provide **Leadership** in overall project implementation in school
- **Contribute educational practices** (pedagogy and practices)
- Valuable comments
- Public experience sharing contributing to the development of the Scheme, subsequently benefiting even more teachers and students

## ***Project Deliverables and Monitoring***

- Reference eLearning classes with good use of VLE functionalities
- Management involvement in planning and evaluation
- Implementation in at least 4 classes
- At least 4 teachers involved
- Quarterly leadership meeting
- Professional sharing and feedback

## *Pilot with Integrated eLearning*

## ***Post Pilot***

- Scale-up
  - Schools start with a few classes adopting eLearning and gradually extend to entire school
- Scale-out
  - Start with a few schools and gradually scale out to all schools
- Tentative Target
  - 10% adoption in 2019 (for example)

## *Pilot Scheme Timeline*

Year	Content
Jun – Aug 2016	Develop prototype
Sep 2016 – Aug 2017	Try out prototype for standard functions
Sep 2017 – Aug 2018	More integration with third party systems and applications
Post pilot - Sep 2018 and beyond	Strategic implementation in other schools by phases
