# GRAND CHALLENGE

Jean Piaget

Understanding and improving the development of digital citizenship as a multifaceted human capacity from childhood to early adulthood

# What is Digital Citizenship?

- Citizenship (traditional) - membership of geopolitical entities such as nation states..... people grew up, lived and worked in neighborhoods home to others who shared their language, culture, religion and values
- People engage not only in physical and face-to-face interaction, but also increasingly via virtual community by means of digital communication tools.
- Multiple citizenship identities, reflecting one's participation in different communities
- Participative identity

# Digital Citizenship: Curriculum Perspectives

- Ethics, rights and responsibilities in the networked society
  - e.g. online bullying, hate speech
- Media literacy for critical and responsible participation on- & off-line
  - E.g. online deliberation, “fake news”
- Capacity building for digital citizenship
  - E.g. education and economic opportunities

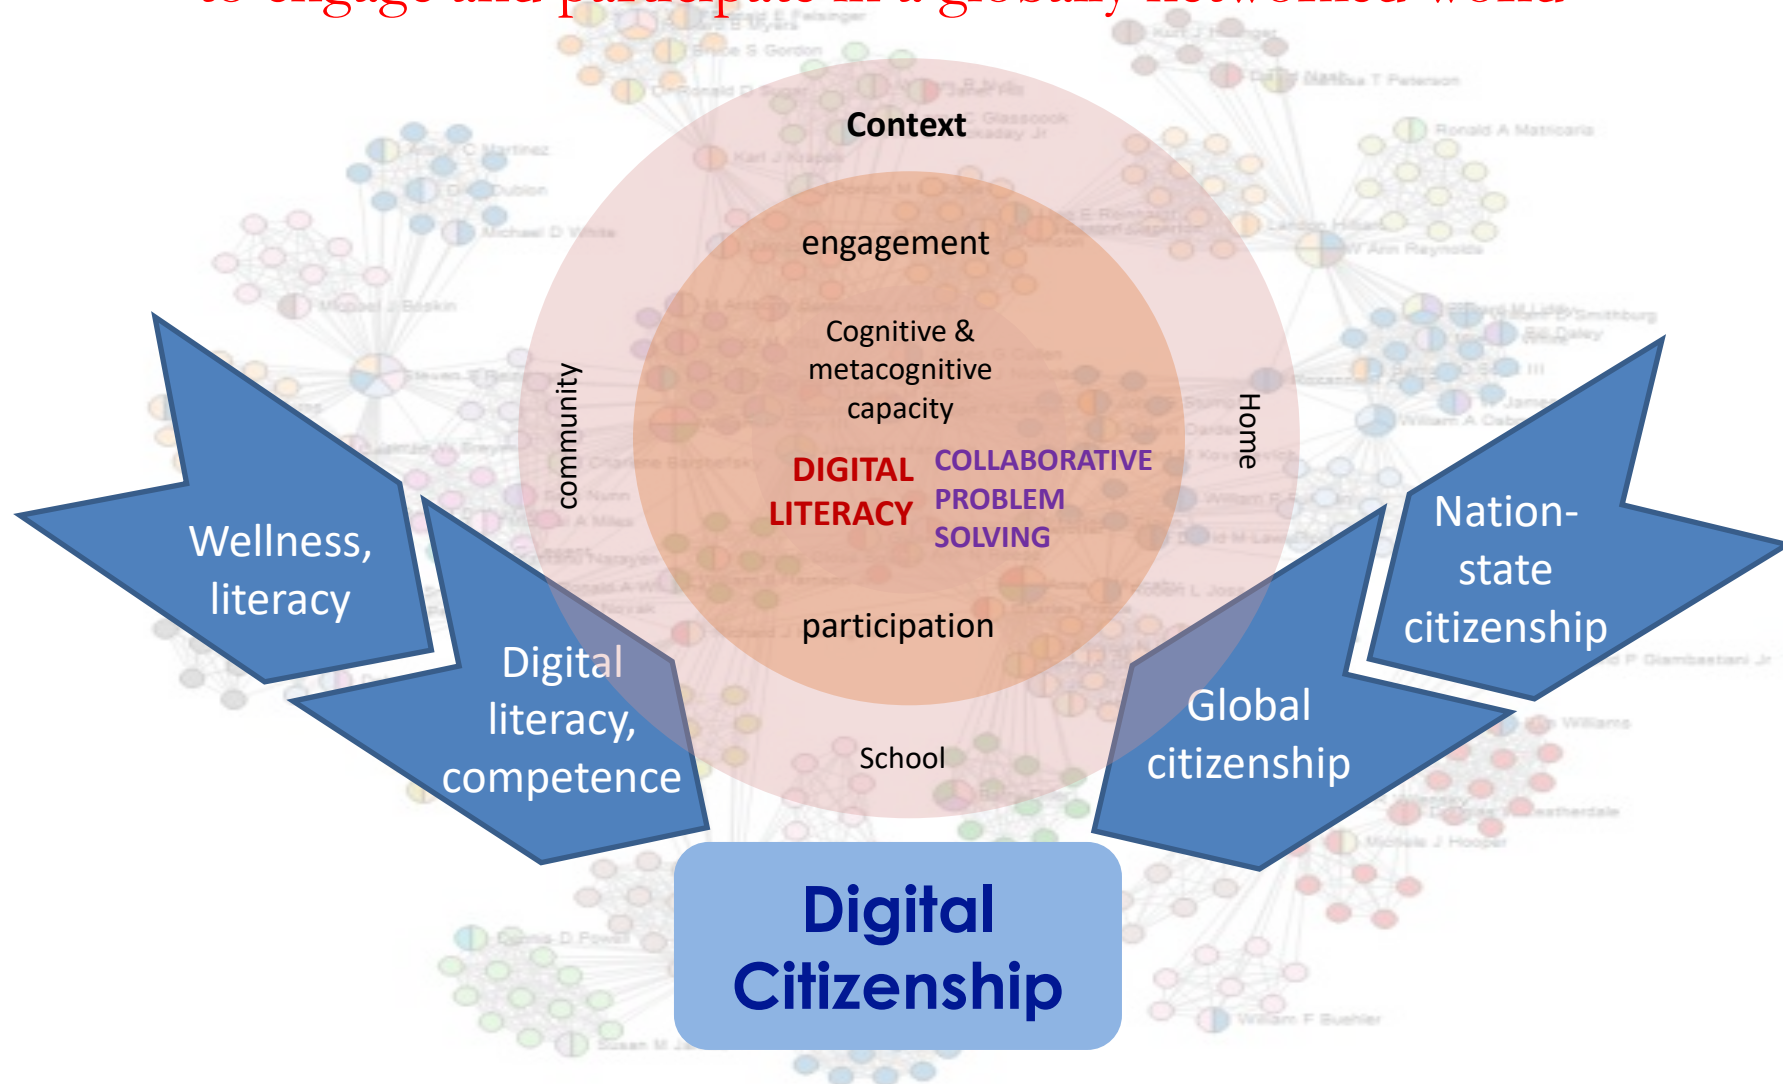

# Impact of Digital Technology on Citizenship

- Augmented performance & connectedness
- Rights & Responsibilities → Engagement & Participation
