# How Open Up began...

In 2016, a series of student suicide tragedies in HK had raised awareness and urged the community for actions.

\* Survey by the Paediatric Society and Paediatric Foundation, Mar-Apr 2016

- ◆ The proportion of youth seeking help through traditional hotlines had been declining.

- ◆ **Privacy is the main reason:** 54% of youth aged 12-30 (N=390) choose NOT to seek help as they "don't want others to find out"; and 30% said there is no one they trust
- ◆ 29% of youth (N=389) **preferred text-based conversation for emotional crisis** issues as it is easier for them to express feelings and allows them to have bigger control over the conversation

The main banner features the text '前路茫茫, 我已經無力再面對任何事情...' (The future is so uncertain, I'm already powerless to face anything...) and a '開始聊天' (Start Chatting) button. Below the banner is a '服務特色' (Service Features) section with icons for a heart, a person, and a clock, representing support for youth, peer support, and 24/7 service. The chat interface on the right shows a message from the system: '請稍候 · 正為你連接 Open Up 嘸嘸導員 · · · 1:28pm'. Below this is a link to the terms of service: '如果你同意我哋嘅服務條款 https://www.openup.hk/terms-of-service 我地就可以開始了 · (請發送1啟動 · ) 1:28pm'. At the bottom right, there are icons for various communication methods: a computer monitor, SMS, a telephone, and a chat bubble with the text 'Click入嚟 chat吓'.

# Help-seeking behavior in digital generation

發現人生入邊有好多苦惱，例如屋企、學業同朋友，自己完全唔知點處理...

呢段時間個心好累...阿爸阿媽又嘈...我又幫唔到佢哋，覺得自己好無用！

我想講下學校同屋企問題...

聽日要測三科，好辛苦...

最近同班Frnd嘈交，之後就一直係班度唱衰我☹

# Mental health help-seeking

「我已經唔太想返學，但係我屋企人覺得我頂到，我應該點樣再同佢哋講？」

「我宜家升中四..但係一考試就手震..頭暈..想嘔，咁樣係咪有精神病？」

「因為我有抑鬱，班裡沒有人理解到我，甚至被最好的朋友孤立、排斥我」

「我係度思考個問題出左係邊，係我唔適應，定係我唔努力所以先會咁。但我根本就做唔到咩，啲功課都係好難先做到，我都唔想做。」

# Help-seeker Top 10 concerns

(1 Oct 2018 – 31 Nov 2020)

# Risk level assessment by AI

4 : 20 : 76

Crisis to High: Medium: Low Risk

45% of users are first-time users for similar services

64% did not receive any services from other Youth Services in the past 6 months

- ✓ Higher proportion of secondary & tertiary student users are in crisis or high risk, indicating the need for more targeted service delivery

Status of youth help-seeker by risk level

- ✓ Users with self-harm behaviours, suicidal ideation, bullying experience, and discharged from psychiatric ward are more likely high risk groups.
- ✓ Users with developmental challenges are less likely in high risk and could be triaged to other social services. Currently Open UP provides 6-8 scheduled thematic care chat sessions to follow up users' needs.
